<u>CLAIM AMENDMENTS</u>:

Please amend Claims 7-9, 13 ,23, 24, 29, and 34-37 as indicated below.

1. - 2.   (Canceled)

3.   (Previously Presented) A method according to Claim 35, wherein the associated meta-data comprises one or more of the following: Time of day; Location information; User provided keywords; and Color information.

4.   (Canceled)

5.   (Previously Presented) A method according to Claim 35, wherein the key features are selected from the group consisting of: (a) Same date and time within a particular range; (b) Same date and location; (c) same Keyword matching; (d) Same date and keyword; and (e) same Color similarities.

6.   (Previously Presented) A method according to Claim 35, further comprising the step of inserting and displaying the one or more captions associated with the plurality of images in a predefined default font, prior to said analyzing step.

7.   (Currently Amended) A method according to Claim 6, wherein said setting step includes:

replacing the predefined default font with ~~one of~~ the selected ~~one or more fonts~~ <u>font</u>, and

displacing the one or more captions associated with the plurality <u>of</u> images in the replaced font.

8.   (Currently Amended) A method according to Claim 35 further comprising the step of inserting and displaying the one or more captions associated with the plurality of images in ~~one of~~ the selected ~~one or more fonts~~ <u>font</u>.

9.   (Currently Amended) A method according to Claim 6, wherein if the meta-data associated with the plurality of images is not found in said ~~selecting~~ <u>analyzing</u> step, the one or more captions remain in the predefined default font.

10. (Previously Presented) A method according to Claim 6, wherein if a best matching key feature is not found in said displaying step, the one or more captions remain in the predefined default font.

11. - 12.   (Canceled)

13. (Currently Amended)   A method according to Claim 35, wherein said setting step includes:

manually selecting one of the ~~automatically selected~~ <u>displayed</u> fonts by a user; and

setting the font of the one or more captions to the manually selected font.

14. - 22.   (Canceled)

23. (Currently Amended)   A method ~~of selecting a font from a collection of fonts for use in one or more~~ <u>according to Claim 35, wherein said captions comprise</u> hyperlinks in a hypertext document, <u>and</u> wherein ~~the one or more texts are in an initial font, said method comprising the steps of: down-loading the hypertext document; locating the one or more hyperlinks in the down-loaded hypertext document;~~ <u>the analyzing step further comprises</u> analyzing the one or more hyperlinks or the hypertext document for information associated with the one or more hyperlinks~~; selecting one font from the collection of fonts, based on~~ <u>to find commonalities in key features of</u> the associated information ~~the associated information of the one or more hyperlink and information associated with the selected font; and replacing the initial font of the one or more hyperlinks with the selected font~~.

24. (Currently Amended)   A method according to Claim 23, wherein the associated information comprises the type and content of the <u>one or more</u> hyperlinks.

25. - 28. (Canceled)

29. (Currently Amended): An apparatus   ~~for selecting a font from a collection of fonts for use in one or more~~ <u>according to Claim 36, wherein said captions comprise</u>

- 5 -

hyperlinks in a hypertext document, _and_ wherein ~~the one or more texts are in an initial font, said apparatus comprising means for down-loading the hypertext documents means for locating the one or more hyperlinks in the down-loaded hypertext document;~~ _said_ means for analyzing _further analyzes_ the one or more hyperlinks or the hypertext document for information associated with the one or more hyperlinks[[;]] ~~means for selecting one font from the collection of fonts, based on~~ _to find commonalities in key features of_ the associated information ~~of the one or more hyperlinks and information with the selected font; and means for replacing the initial font of the one or more hyperlinks with the selected font~~.

       30. - 33. (Canceled)

       34. (Currently Amended)   A computer program product ~~comprising a computer program recorded in a computer-readable medium, for controlling the operation of a data processing apparatus on which the computer program executes to perform a method of selecting a font from a collection of fonts for use in one or more~~ _according to Claim 37, wherein said captions comprise_ hyperlinks in a hypertext document, _and_ wherein _said_ ~~the one or more hyperlinks are in an initial font, said computer program comprising: means for locating the one or more hyperlinks in the hypertext document;~~ means for analyzing _further analyzes_ the one or more hyperlinks or the hypertext document for information associated with the one or more hyperlinks[[;]] ~~means for selecting one font from the collection of fonts, based on~~ _to find commonalities in key features of_ the associated information ~~of the one or more hyperlinks and~~

~~information associated with the selected fonts; and means for replacing the initial font of the one or more hyperlinks with the selected font.~~

35.   (Currently Amended) A method of selecting a font from a collection of fonts for use in one or more captions associated with a plurality of images, the images having associated meta-data, said method comprising the steps of:

analyzing the meta-data associated with the plurality of images to find commonalities in key features in the meta-data;

determining from the analysis step a most common <u>key</u> feature among the commonalities in <u>said</u> key features in the meta-data associated with the plurality of images;

displaying, from ~~a library~~ <u>said collection</u> of fonts comprising a plurality of fonts having a set of one or more associated key features, a number of fonts best matching the most common key feature determined in said determining step;

selecting a desired font from the displayed fonts; and

setting a font of the one or more captions to the desired font.

36.   (Currently Amended) An apparatus for selecting a font from a collection of fonts for use in one or more captions associated with a plurality of images, said images having associated meta-data, said apparatus comprising:

means for analyzing the meta-data associated with the plurality of images to find commonalities in key features in the meta-data;

means for determining from results provided by said means for analyzing, a most common key feature among the commonalities in said key features in the meta-data associated with the plurality of images;

means for displaying, from ~~a library~~ said collection of fonts comprising a plurality of fonts having a set of one or more associated key features, a number of fonts best matching the most common key feature determined by said means for determining;

means for selecting a desired font from the displayed fonts; and

means for setting a font of the one or more captions to the desired font.

37.   (Currently Amended) A computer program product comprising machine-readable program code recorded in a machine-readable recording medium, for controlling the operation of a data processing apparatus on which the program code executes to perform a method of selecting a font from a collection of fonts for use in one or more captions associated with a plurality of images, the images having associated meta-data, said method comprising the steps of:

analyzing the meta-data associated with the plurality of images to find commonalities in key features in the meta-data;

determining from said analyzing step a most common key feature among the commonalities in said key features in the meta-data associated with the plurality of images;

displaying, from ~~a library~~ said collection of fonts comprising a plurality of fonts having a set of one or more associated key features, a number of fonts best matching the most common key feature determined in said determining step;

selecting a desired font from the displayed fonts; and

setting a font of the one or more captions to the desired font.
